Annual Fugitive Dust Control Report

October 15, 2026

This report addresses the annual fugitive dust control reporting requirements in the Federal Coal Combustion Residuals (CCR) Rule specified in Title 40 of the Code of Federal Regulations (CFR), Section (§) 257.80(c). As detailed in 40 CFR §257.80(c), an annual report must be prepared and placed in the Site operating record within one year of placing the previous Annual Fugitive Dust Control Report in the operating record. The 2026 annual report for the compliance period starting October 20, 2025, and ending October 17, 2026, is presented herein.

1) All actions taken by facility to control fugitive dust generation from Ash Basin 1. A copy of the Plan's Weekly Fugitive Dust Inspection Logs is attached to this report - Attachment 1. The weekly inspection logs identify any actions taken to minimize and control fugitive dusting.

2) A record of all citizen complaints. There were no citizen complaints received during this reporting period associated with the Ash Basin 1 CCR unit.

3) A summary of any corrective measures taken to mitigate fugitive dust generation. Any corrective action measures taken as a result of identifying fugitive dusting events during the reporting period are included in the Weekly Fugitive Dust Inspection Logs. The logs are included in this report as Attachment 1.

As required under 40 CFR Part §257.106(9), after posting the initial and subsequent Annual CCR Fugitive Dust report to the facility operating record, notification of the posting must be made to the PADEP Regional Waste Director.

This report is also required to be posted to the publicly available web-site as required under 40 CFR Part §257.107(9).
